

Enable your Technical Education Students to Publish their Research in a Peer-Reviewed Journal!

Sept 2023 – July 2024

JATE URE

The purpose of this pilot project is to support community college faculty in technical education programs to develop and incorporate scientific communication lessons into their research programs, to enable their students to become peer-reviewed published journal authors.

Who should apply?

Community College faculty in technical education programs who engage in undergraduate research with their students and are interested in supporting their students to write and submit a peer-reviewed research article

Benefits:

Professional development & peer-coaching to develop training materials.
Coaching support for student writing teams.
\$2500 Stipend for Faculty.
\$1500 Stipend for Students.

Expectations:

Work with other faculty to customize or create training materials.
Meet regularly with students and monitor their participation in the program.
Help students write & publish an article in JATE.
Provide feedback & input on the pilot.
