

From Vial to Patient

Packaging in the Biotech Supply Chain

How packaging protects product quality, meets regulatory requirements, and gets therapies to patients - and the technician skills industry needs most.

Join us for the first of our monthly meet-ups on BioSCOPE 101 implementation, classroom resources, and supply chain careers beyond the bench. Share your projects, connect with colleagues, and help shape the future of the Supply Chain Hub. Open to all educators who have attended our workshops or want to bring industry roles into their students' reagent and kit manufacturing.

FEATURED SPEAKER

ALEC THILMONY

Packaging Engineer II, BioMarin Pharmaceutical

Alec Thilmoney helps develop and implement packaging solutions that ensure medicines reach patients safely. He holds a B.S. in Industrial Technology and Packaging from California Polytechnic State University, San Luis Obispo, and began his career in the biotechnology industry at Amgen. During this webinar, Alec will discuss the role of packaging engineering within the biotech supply chain and highlight career opportunities in biotechnology beyond the laboratory.

WHEN:
Wednesday,
November 4, 2026
4 PM PT

WHO SHOULD ATTEND:
HS, CC, 4-yr educators and their students.
Presentation will be recorded for access via the InnovATEBIO YouTube Channel.
